Not wanted ...	We try to reach ...
1 **Massive loss of work, making unemployment to a normal status**	**continuity in the world of jobs,** **having jobs is main goal of industry**
2 **single IT-systems, which are not fitting to each other**	**continuity of software,** **upgradeable systems, new systems gratis**
3 **psychological results (f. in. in advertising only) lead to not wanted purchase**	**psychological sciences are used for real enduring joy, better trust and cooperation**
4 **computers bind human by easy usability too much**	**usability has to take care of all human senses**
5 **human try to do all, what the computer wants, they get slaves of a machine;** **human lose control over their grade of tiredness, get in some senses overloaded (eyes, fingers, brain).**	**communication between human,** **we only use a computer, we can´t communicate with but by him**
6 **computer promotes stress (Distress),**	**we have to style the interface and interaction between human and computer by obeying human needs,**

	frustration by doing always the same, not noticed tiredness	**future computers have to bring Eustress, success, harmony, (work-) enjoyment.**
7	**ordering limits of time, which are not reachable, therefore comes sadness till depression**	**the control of dialog-time and -habit is at the users side, it depends on his feeling, motivation and capability**
8	**Science Fiction Shows with too loud and (in evolution never reachable) figures, they shock the human phantasy and occupy the whole human mind in a not enjoying way**	**talking's about virtual seen events should be activated, more movement by motivating games for youngsters and grownups**

These postulates are written down in that form for first time. All scientists worldwide are invited to write their meanings. The next step is a HO-Meeting for overwriting this first issue.

ISO Standard 9241 (Ergonomics of Human System Interaction) is a fundamental basis, but not yet enough…..

The result of this postulates are reachable by a great amount of positive connections worldwide. So please communicate this HO-Manifesto!
